10+

Languages: JavaScript, HTML,
CSS.

Tools: POSTMAN, GIT, VS
CODE

Objective

To be an excellent professional and to be a part of an organization which provides constant learning of latest technological upgrades, and provides career growth.

Experience : Working as Angular Developer since March 2020 (2+ years) in PickHTML technologies.

Project : HOTEL MANAGEMENT AND MONITORING.

Technology Used: Angular, HTML/CSS, JS

Client Name: Ambroasian Research And Development.

Description : The project was focused on creating a platform for hotel owners to list their hotels on the online platform, The web application included three user types, ADMIN, HOTEL OWNER and USER, The project had two portal running, One included for ADMIN and HOTEL OWNER and other was the USER Portal which was accessible by anyone. The admin was responsible for adding new HOTEL OWNERS and verifying the information filled by the HOTEL OWNERS. Once the HOTEL OWNER was created he/she was responsible for adding the hotel details for their hotel. same details where visible on the web portal created for USER after verification by the ADMIN

My responsibilities included creating the components, services and making http calls and binding the data, as per requirement given by the Senior person,

Summary

A well versed front-end developer, proficient in Angular, HTML/CSS and JavaScript. good exposure to web development practices, familiar to Components, Services, pipes, Directives, forms, routing concepts and life cycle hooks in angular
