To be an excellent professional and to be a part of an organization which provides constant learning of latest technological upgrades, and provides career growth.

Experience : Fresher

Project : ONLINE VOTING SYSTEM

Technology Used: Angular, HTML/CSS, JS

Description : online voting system is developed with the aim of creating a platform which will make voting process easier allowing citizens above 18 years of age to cast their vote online. There is database which is maintained in which all the names of voter with complete information is stored. This web-based project is implemented in the ASP.NET with C# using SQL server database as a back-end Microsoft visual studio.NET as a front end tools.

In "online voting system" a voter can use his/her voting right online without any difficulty. He/she has to be login first for him/her to vote. Login is mainly done by system administrator to security reasons.

Languages: JavaScript, HTML, CSS.

Tools: GIT, VS
CODE

Summary

A well versed front-end developer, proficient in Angular, HTML/CSS and JavaScript. good exposure to web development practices, familiar to Components, Services, pipes, Directives, forms, routing concepts and life cycle hooks in angular
